

Birdman from the Pampas

Conor Mark Jameson

In a fascinating new book, William Henry Hudson's biographer explores the Argentine naturalist's contribution to ornithology and conservation. This article should whet your tastebuds...

1 Hudson's Canastero *Asthenes hudsoni*, La Covina, General Lavalle, Buenos Aires, Argentina, November 2022 (Nick Brooks). This Near Threatened species is one of two, both described by Philip L. Sclater in the 1870s, that bear Hudson's name. (The other is Hudson's Black-Tyrant *Knipolegus hudsoni*.)
