

**Lowest-elevation record of
Lyre-tailed Nightjar *Uropsalis
lyra* in Peru**

At dusk on 16 October 2010 a male Lyre-tailed Nightjar *Uropsalis lyra* sang at a cliff close to the Mirador de Itahuania, in the Cordillera de Pantiacolla, dpto. Madre de Dios, south-east Peru (12°38'S 71°16'W; 920 m). The bird sang again next morning at c.04h40–05h00, when I recorded it (www.xeno-canto.org/70224). In Peru *U. lyra* occurs along the east slope of the Andes at 1,300–2,800 m^{2,3}. In Ecuador it has been reported as low as 800 m¹. The record from the Cordillera de Pantiacolla constitutes the lowest known occurrence of *U. lyra* in Peru.
